

TECHNICAL DATA SHEET

ADDAGE SUPERCON PLUS LIQUID

PRODUCT DESCRIPTION

Addage Supercon plus is a liquid which acts as a Setting hardener for Concrete. Fast hardening compound for Concrete hardening liquid, also known as anti-wear concrete liquid, is a substance that is used to smooth concrete surfaces and polish them.

The goal of employing this material is to boost concrete's high mechanical strength so that it can endure abrasion, impact, and other damage.

PROPERTIES

Fast setting
Early strength.
Good finish.
Early demoulding and increase production

APPLICATION

Pavar Block
Pavar Tile
Cover block
Fly ash bricks

ADVANTAGES

Saving on material, labour and moulding time.

Addage Supercon plus is liquid in form, hence easy to use.

The plasticizing action of **Addage Supercon plus** helps in complete hydration of cement there by achieving superior strength.

Wastage due to breaking in pre-cast elements is reduced saving on production cost.

Addage Supercon plus can be used with all types of cements.

DIRECTION FOR USE

Before adding to the dry mix, Addage Super con is blended in the appropriate quantity of measuring water. It should be applied during the cement and flyash slurry process.

DOSAGE

Required dosage of **Addage Supercon plus** has to be arrived at site by practical trials. The dosage is dependent on temperature conditions, type of cement, type of acceleration required. We recommend dosages 200 ml per 50 kg cement Bag.

STORAGE:

ADDAGE Supercon plus should be stored in a cool place and protected against moisture.

SHELF LIFE

Storage time should not exceed 6 months from receipt of delivery.

PACKING:

Addage Supercon Plus is available in 60 Kg Can & 250 Kg Barrel.
