

TECHNICAL DATA SHEET

ADDAGE- DEFOAMER LIQUID

PRODUCT DESCRIPTION

ADDAGE DEFOAMER LIQUID is a highly effective, ready-to-use anti-foaming agent formulated to control and eliminate unwanted foam in aqueous and non-aqueous systems. It is designed for rapid foam knock-down and long-lasting suppression during production, application and processing operation. This liquid defoamer exhibits excellent dispersibility, thermal stability, and compatibility across a wide range of applications.

PROPERTIES

Quickly eliminates surface and entrapped foam during mixing or processing.
Requires small quantities to achieve effective foam control, making it cost-efficient.
Long lasting performance.
Stable under high temperature and pH variations.

APPLICATION

Construction chemicals
Paints & coatings
Wastewater treatment
Manufacturing processes.

TECHNICAL SPECIFICATION

Test	Result
Appearance	Hazy liquid
Bulk density	1.15 ± 0.5
pH	7-8

ADVANTAGES

No adverse effect on product properties

Ready-to-use formulation

Efficient foam control

DOSAGE

We recommend dosages are 0.5 to 1.0 % of the total weight of mix.

STORAGE:

It should be store in cool, dry area away from direct exposure to sunlight.

SHELF LIFE

ADDAGE DEFOAMER LIQUID store in original unopened package, it will remain its original performance for 1 year.

PACKING:

ADDAGE- DEFOAMER LIQUID is available in 200 kg Barrel.
