## Addage Set fast

*Fast hardening compound for Concrete*

### *SPECIFICATION*

**Addage Set Fast** is a liquid which acts as a Setting hardener for Concrete.

### *PRIMARY USES*

1. fast setting
2. Early strength.
3. Good finish.
4. Early demoulding and increase production

### *ADVANTAGES*

1. Saving on material, labour and moulding time.
2. **Addage Set Fast** is liquid in form, hence easy to use.
3. The plasticizing action of **Addage Set Fast** helps in complete hydration of cement there by achieving superior strength.
4. Wastage due to breaking in pre-cast elements is reduced saving on production cost.
5. **Addage Set Fast** can be used with all types of cements.

### *DIRECTION FOR USE*

**Addage Set Fast** is mixed in the gauging water in the required proportion before addition to the dry mix. It should be added at the time of cement and flyash slury.

### *DOSAGE*

Required dosage of **Addage Set Fast** has to be arrived at site by practical trials. The dosage is dependent on temperature conditions, type of cement, type of acceleration required. We however recommend dosages of 1 to 2 percent by weight of cement.

### *PACKING*

**Addage Set Fast** is available in 60 Kg & 250 Kg Barrel.
